

HVT Decipherment Method

Replication Resources

Should anyone be interested in trying to replication the HVT decipherment process for themselves, the following have been added to the project folder:

- Humoral True-Type (HTT) font, with HTT font map;
- HVT Notation Sheet;
- HVT Decipherment Key 1.0 for Beinecke MS 408;
- First-level Word Doc template, with three different style suggestions;
- Second-level translation spreadsheet (released as an Excel spreadsheet in case it makes it easier for data/statistical analysis); and
- Text Replacement Key Suggestions for first-level decipherment (because there's a limit to how many times you can type 'phlegm').

Please note: to view HTT on word docs and spreadsheets, the HTT font will first need to be installed.

All materials are open source (i.e. free) by a Creative Commons license.

Disclaimer: In the interest of transparency, I did set up a financial support site on [Ko-fi](#) just in case anyone wants to support this project. However, please know it is only there as an option, absolutely not a requirement in any way, shape, or form. This is a contribution to a community project, and all materials are downloadable, free of charge for anyone who wants to participate and see if they can replicate the results for themselves.
