| ::x     | Innate Heat        |
| ::i     | One Degree         |
| + -     |                    |

Done

★

This is a keyboard input suggestion for the first-level decipherment to avoid having to spell out the same words ad nauseum. It populates the 'With' text whenever the 'Replace' text is input into any text document.

★

While AI can be used instead of directly typing out the text by feeding it HTT text directly from a page and along with the HVN Notation Sheet, an LLM's read on the notation sheet isn't always accurate and it can make mistakes.

★

Text replacement option should be under 'Text Input' in keyboard settings.
