Second-Level

Outer Circle

(humiditas)(intense moisture)(caliditas) (slow dispersio)(moisture)(caliditas) (slow emanatio)(intense sludge)(blockage) (cold and dry exhalations) (earth's subterranean cavities or mines)(hot and dry) (slow dispersio)(earth)(caliditas) (slow dispersio)(primordial moisture)(caliditas) (slow dispersio)(cold and dry exhalations) (sludge)(emanatio)(inflation) (slow dispersio)(air)(temper corruption) (slow dispersio)(primordial moisture)(this operation is manifesting strongly) (slow emanatio)(inflation) (slow dispersio)(inflation) (cycles of flux and reflux)(dirt)(burns) (slow dispersio)(sludge)(caliditas) (transmutation of minerals)(motio)(inflation) (primordial moisture)(temper corruption) (pneuma)(primordial moisture)(intense moisture)(blockage) (slow dispersio)(sludge)(caliditas) (cycles of flux and reflux)(moisture)(this operation is manifesting strongly) (primordial moisture)(temper corruption) (earthly furnace)(primordial moisture)(caliditas) (boiling)(this operation is manifesting strongly) (transmutation of minerals)(inflation) (transmutation of minerals)(generatio)(congealing) (this operation is manifesting strongly) (transmutation of minerals) (innate heat)(motio)(moisture)(thickening) (irrigation of the earth) (inflation) (slow dispersio)(sludge)(caliditas) (temper corruption) (slow dispersio)(intense moisture)(blockage) (slow generatio)(inflation) (the deep springs and estuaries)(temper corruption)

Inner Circle

(slow motio)(intense moisture)(blockage) (primordial moisture)(cosmic exhalations) (slow dispersio)(primordial moisture)(temper corruption) (primordial moisture)(sludge)(caliditas) (slow dispersio)(primordial moisture)(caliditas) (transmutation of minerals)(thickening)(caliditas) (slow dispersio)(intense moisture)(this operation is manifest) (cold and dry exhalations) (congealing) (air)(one degree)(blockage) (transmutation of minerals) (slow dispersio)(intense moisture)(blockage) (cold and dry exhalations) (cold and dry exhalations)(atmospheric cooling of the cosmos)

Winter

(adust manifesting moderately) (congealing) (congealing) (inflation) (slow emanatio)(earth)(caliditas) (cycles of flux and reflux)(congealing) (intense boiling)(caliditas) (thermal evaporation)(moisture)(inflation) (transmutation of minerals)(generatio)(cold and dry exhalations) (cold and dry exhalations)(hot and dry) (tempers the corruption by one degree) (boiling)(primordial moisture) (congealing)(inflation) (imperfect concoction) (this operation is manifesting strongly) (the crystalline sphere)(tempers corruption) (transmutation of minerals)(motio)(cold and dry exhalations) (thermal evaporation)(congealing)(pneuma) (wet death/living rot)(adust)(intense moisture)(adust)

Spring

(emanatio)(sludge)(strongly dilutes the essence)(hot and dry) (transmutation of minerals)(motio)(moisture)(hot and dry) (cosmic governance)(moisture)(caliditas) (boiling)(burnt primordial moisture) (generatio)(intense sludge)(hot and dry) (slow dispersio)(sludge) (caliditas) (thickening)(dispersio)(moisture)(hot and dry) (earth churning)(moisture)(hot and dry) (slow dispersio)(intense moisture)(hot and dry) (transmutation of minerals) (suffocatio)(moisture of primordial moisture)(blockage)(inflation) (this operation is manifesting strongly) (cycles of flux and reflux)(inflation) (dispersio)(sludge)(caliditas) (slow dispersio)(moisture)(caliditas) (cycles of flux and reflux)(earth)(caliditas) (rays of the stars or light)(moisture)(hot and dry) (fast dispersio)(sludge)(caliditas) (balancing primordial moisture)(temper corruption) (cycles of flux and reflux)(moisture)(temper corruption) (cosmic governance)(cold and dry exhalations) (cycles of flux and reflux)(substrate receiving blood) (cycles of flux and reflux)(irrigation of the earth) (wet death/living rot)(two degrees)(adust) (earth)(strong) (boiling)(this operation is manifesting strongly) (thickening)(motio)(earth) (radical moisture)

Summer

(slow dispersio)(earth burns) (boiling)(ideal transformation) (sludge)(warm and dry) (vitrification of a firestorm)(inflation) (congealing) (boiling)(caliditas) (dispersio)(moisture)(caliditas) (wet death/living rot)(heats air)(at highest intensity) (dryness) (fast dispersio)(moisture)(temper corruption) (earth's air burns) (inflation) (cold and dry exhalations)(primordial mositure)(caliditas) (fast emanatio)(sludge)(caliditas) (temper corruption) (sludge)(caliditas) (congealing) (primordial sap of the earth) (slow dispersio)(intense moisture)(hot and dry) (feeding the crucible)(thin spirit) (humiditas)(balances pneuma) (thin spirit) (sludge)(hot and dry) (congealing) (cold and dry exhalations) (transmutation of minerals)(cold and dry exhalations) (balanced pneuma)

Autumn

(slow motio)(intense moisture)(adust) (transmutation of minerals)(inflation) (cosmic governance)(pneuma) (earth)(caliditas) (burnt air)(siccitas) (cosmic governance)(boiling)(caliditas) (feeding the crucible)(balanced pneuma) (rays of the stars or light)(hot and dry) (fast motio)(intense moisture)(caliditas) (sludge)(caliditas) (cold and dry exhalations) (inflation) (empyrean heaven)(moisture)(one degree)(caliditas) (congealing) (air)(one degree)(blockage) (transmutation of minerals)(sludge)(melancholia) (cosmic governance)(pneuma) (boiling)(caliditas) (cosmic governance)(moisture of primordial moisture)(caliditas) (rebalance the moisture of the primordial moisture)(motio)(moisture)(caliditas) (stagnation)(caliditas) (boiling)(caliditas) (rebalance the primordial moisture) (this operation is manifesting strongly) (sudden frost) (cold and dry exhalations) (boiling)(caliditas) (cosmic governance)(boiling)(hot and dry) (balancing primordial moisture)(adust)(intense moisture)(hot and dry) (congealing) (inflation) (humiditas) (transmutation of minerals) (innate heat)(heavy, smoggy thaw) (imperfect concoction) (transmutation of minerals) (boiling)(transmutation of minerals)(hot and dry)

Human-Generated Translation (Best Guess)

Outer Circle: "Humidity and intense moisture warm and slowly disperse hot water. Slow emanation of intense sludge causes a blockage. There are cold and dry exhalations. Earth's subterranean cavities run hot and dry, slowly dispersing heat through the earth. Heat slowly disperses into the primordial moisture, slowly dispersing cold and dry exhalations. Sludge emanates, causing inflation. There is a slow dispersion of air to temper the corruption. The slow dispersion of the primordial moisture is an operation that is manifesting strongly. There is a slow emanation that causes inflation, then a slow dispersion that causes inflation. The cycles of flux and reflux burn the earth. There is a slow dispersion of warm sludge and the transmutation of minerals moves, resulting in inflation. The primordial moisture tempers corruption. The pneuma and primordial moisture and intense moisture form a blockage. There is a slow dispersion of warm sludge. The cycles of flux and reflux result in moisture, which is an operation that is manifesting strongly. The primordial moisture tempers corruption. The earthly furnace's primordial moisture warms. There is boiling, which is an operation that is manifesting strongly. The transmutation of minerals is causing inflation. The transmutation of minerals is generating congealing, which is an operation that is manifesting strongly, resulting in the transmutation of minerals. Innate heat moves moisture and thickens. The irrigation of the earth causes inflation. There is slow dispersion of warm sludge that tempers corruption. There is slow dispersion of intense moisture for the blockage. There is slow generation of inflation, and the deep springs and estuaries temper corruption."

Inner Circle: "Slow movement of intense moisture causes a blockage. There is a slow dispersion of primordial moisture and cosmic exhalations, where the primordial moisture works to temper corruption. The primordial moisture and warm sludge slowly disperse warm primordial moisture. The transmutation of the minerals thicken and warm. There is slow dispersion of intense moisture, which is an operation that is manifest. Cold and dry exhalations congeal. Air at one degree results in a blockage. The transmutation of minerals slowly disperse intense moisture in the blockage. Cold and dry exhalations manifest two-fold and there is an atmospheric cooling of the cosmos."

Winter: "Adust is manifesting moderately. Congealing is manifesting two-fold, resulting in inflation. There is a slow emanation of heat in the earth. Cycles of flux and reflux result in congealing, and with intense boiling, there is heat where thermal evaporation's moisture causes inflation. The transmutation of the minerals generates cold and dry exhalations. Cold and dry exhalations heat when the corruption is tempered by one degree. There is boiling of the primordial moisture. Congealing causes inflation, resulting in an imperfect concoction, which is an operation that is manifesting strongly. The crystalline sphere tempers corruption. The transmutation of minerals move cold and dry exhalations. Thermal evaporation congeals the pneuma. There is wet death and living rot; a burning corruption of the intense moisture, which results in complete adustion."

Spring: "Emanating is sludge that strongly dilutes the essence, resulting in hot and dry. The transmutation of minerals moves moisture towards the hot and dry. Cosmic governance heats moisture. There is boiling that burns the primordial moisture, generating intense sludge that is hot and dry. There is slow dispersion of warm sludge. A thickening disperses moisture that is hot and dry. Earth churns moisture that is hot and dry, then slowly disperses intense moisture that is hot and dry. The transmutation of minerals suffocates the moisture of primordial moisture, and there is a moderate blockage and inflation, which is an operation that is manifesting strongly. The cycles of flux and reflux cause inflation. There is dispersion of warm sludge, and slow dispersion of warm moisture. The cycles of flux and reflux on earth warm. Moisture from the rays of the stars or light result in warm moisture. Fast dispersing sludge warms. Balancing primordial moisture tempers corruption. Cycles of flux and reflux temper corruption. There is cosmic governance of cold and dry exhalations. The cycles of flux and reflux result in the substrate of earth receiving blood. The cycles of flux and reflux irrigate the earth. The wet death moves two degrees of adustation. Earth is strong. Boiling is an operations that is manifesting strongly. There is thickening moving through the earth. There is radical moisture."

Summer: "Slow dispersion of burning earth. Boiling is the ideal transformation. Sludge is warm and dry. The vitrification of a firestorm results in inflation. There is congealing. Boiling heat. Dispersion of warm moisture. Wet death heats the air at the highest intensity. There is dryness. Fast dispersing moisture tempers corruption. Earth's air burns. Thre is inflation. Cold and dry exhalations of the primordial moisture warm. There is fast emanation of warm sludge. Corruption is tempered. Sludge warms and congeals. The primordial sap of the earth slowly disperses intense moisture that is hot and dry. Feeding the crucible results in a thin spirit. Humiditas balances the pneuma through thin spirit. Sludge is hot and dry. There is congealing. There are cold and dry exhalations. The transmutation of minerals yields cold and dry exhalations, bringing the pneuma to perfect balance."

Autumn: "Slow movement of intense moisture corrupts. Transmutation of minerals results in inflation. There is cosmic governance of the pneuma. Earth warms. Burnt air dries up. There is cosmic governance of boiling that warms. Feeding the crucible results in a balanced pneuma. Rays of the stars of light are hot and dry. There is fast moving and intense warm moisture. Sludge warms. There are cold and dry exhalations. There is inflation. The empyrean's moisture is one degree of warmth. There is congealing. Air is one degree of the blockage. The transmutation of minerals in the sludge results in melancholia. There is cosmic governance of the pneuma. There is boiling heat. There is cosmic governance of the moisture of the primordial moisture that is warm. Rebalancing the moisture of the primordial moisture causes moisture to move moisture through heat, which stagnates in the warmth and boils with heat; this operation to balance the primordial moisture is manifesting strongly. There is a sudden frost and there are cold and dry exhalations. There is boiling heat. There is cosmic governance of the boiling hot and dry. Balancing the primordial moisture results in adust and intense moisture that is hot and dry. There is congealing. There is inflation. There is humiditas. The transmutation of minerals in the innate heat causes a heavy, smoggy thaw. The concoction is imperfect. There is the transmutation of minerals. There is boiling and the transmutation of minerals is hot and dry."
